Monitoring of the 2023 Financial Management Plan
September 2024

Background

In between actuarial valuations, the Trustee monitors the financial position of the Scheme. This document provides details of the monitoring for the quarter ending 30 September 2024 based on the 2023 valuation. It follows the Financial Management Plan and monitoring framework which the Trustee has established for the Scheme.

The purpose of the monitoring is to indicate whether or not the Scheme's financial position is progressing as expected. It does not lead to any direct action from the Trustee other than potentially commissioning further analysis and advice.

Further, it should be noted that monitoring is not intended to answer the question: what are the contribution requirements if a valuation was undertaken at the monitoring date?

This document is published by the Trustee for information only and is not intended to be used as the basis for any decisions.

Monitoring of the 2023 Financial Management Plan
September 2024

Differences between monitoring and actuarial valuation

The monitoring approach is not as thorough as that adopted at an actuarial valuation and hence does not give the same outcome as would be given by an actuarial valuation at the effective date. This is for a number of reasons, including:

- While monitoring updates the main financial assumptions, these and other assumptions do not go through the same level of assessment as would be the case for an actuarial valuation. For example, when setting the mortality assumption at a valuation we would undertake a full review of the Scheme's experience, as well as considering other relevant evidence. Further, the assumptions used for monitoring do not necessarily reflect the risk capacity and appetite of employers at that date. A valuation also involves a full review of the covenant provided by the employers whilst our monitoring seeks only to capture any change in the covenant that requires further investigation. In practice for an actuarial valuation the Trustee's Integrated Risk Management Framework would also potentially influence the choice of assumptions.
- An actuarial valuation would require consultation with UCEA in relation to the assumptions used and the contributions payable; it is not possible to pre-judge the outcome of any such process.
- Any deficit recovery contributions needed would be based on additional factors, including the views of the Pensions Regulator.
- The calculations do not allow for new membership data, and contain some approximations relative to an actuarial valuation.

The monitoring position is relatively volatile from quarter to quarter, and in light of this the Trustee considers the overall history and trends since the valuation date rather than just the position at the monitoring date.

- Market conditions at the end of September 2024 were comparable to those at the end of June 2024. As such, the Technical Provisions surplus and future service contribution requirement at the end of September were similar to those at the end of June 2024.
- Since the March 2023 valuation date, market conditions have become more favourable. This leads to a higher TP surplus when compared to the valuation date, allowing for benefit improvements granted on 1 April 2024, and a lower future service contribution requirement. The self-sufficiency funding position has also improved since the valuation date and now shows a small surplus.

This is the Trustee's Financial Management Plan Monitoring report which is used by the Trustee to track the financial development of the Scheme.

QUARTER END FMP MONITORING REPORT - END SEPTEMBER 2024

Technical Provisions

£9.1bn Surplus

Valuation date (31/03/2023)	£7.4bn Surplus
Liability	£66.2bn
Pre-retirement discount rate	Gilts + 1.91%
Post-retirement discount rate	Gilts + 0.79%

Self-Sufficiency

£1.0bn Surplus

Valuation date	£5.1bn Deficit
Liability	£74.3bn
Discount rate	Gilts + 0.37%
Self-sufficiency VaR	£15.0bn

Assets

£75.3bn

Valuation date	£73.1bn
'Breakeven' discount rate	Gilts + 0.36% CPI + 1.81%

Future Service Contribution Requirement

18.9%

Valuation date	20.6%

Future Service Contribution Requirement

Current RAG	18.9% (Green)
Last quarter-end (Jun-24)	18.7% (Green)
Trigger if Red for two quarters	No

Investment Risk

The underlying Investment Risk metrics are all green (at last review)

RAG Green

IRMF - Actual Reliance

	31-Mar-23	30-Sep-24
Actual Reliance (£bn)	13.1	6.9
% of AffRC	47%	24%
RAG	Green	Green

IRMF - Target Reliance

	31-Mar-23	30-Sep-24
Target Reliance (£bn)	20.5	16.1
% of AffRC	73%	56%
RAG	Green	Green

Covenant

Unchanged

Valuation date	Strong
Covenant:	Green

Note: Affordable Risk Capacity is determined as the present value of 10% of eligible sector salaries over 30 years. The 'Breakeven' discount rate is that at which the liability value equals the asset value.

QUARTER END FMP MONITORING REPORT - END SEPTEMBER 2024

Quarterly covenant monitoring update

SUMMARY The covenant remains Strong

Rationale:

- No indication of significant weakening of financial position of employers that contribute the majority of employer risk capacity
- Employer capacity to support risk remains in excess of Scheme reliance on employers

KEY DEVELOPMENTS

- The Department for Education announced that HE sector regulator the OfS will be refocussed to prioritise the financial stability of the sector and deliver better quality and outcomes for students. DfE also announced the appointment of Sir David Behan as interim chair of the OfS following his earlier review of the regulator and its work (Aug-24).
- UCAS data for the end of the first month of the 2024 Clearing process showed overall undergraduate applicant numbers down 1% y/y to 675K, the second successive year of decline (although participation rates for the 18y/o cohort were up slightly y/y). Undergraduate acceptances were up 1% y/y overall (to 498k), with "high tariff" HEIs increasing acceptances by 7.8% while "medium tariff" HEIs saw a 0.5% decline in acceptances and "low tariff" HEIs a 4.4% decline. Various media sources reported that Clearing was notably more competitive than it has been in recent years (Sept-24).
- Walesonline covered the announcement by the Welsh government of a 10% reduction in HE sector funding in the principality for 2024-25 (Jul-24). The Scottish government announced a 6% y/y reduction in cash funding to the sector for 2024-25 (Sept-24).
- The Australian government announced it would cap new international student enrolments at 270k in 2025 (new enrolments in 2023 were 283k), with fixed quotas for individual universities (Aug-24). The Canadian government announced a 10% y/y reduction in the number of international students it intends to admit for 2025, targeting 437k study visas in aggregate (2024: 485k) with regional quotas. Canada issued 514k study visas in 2023 (Sept-24).
- The Home Office's monthly release of visa application data showed a 17% y/y decline in the number of applications for study visas for the first 8 months of 2024 and an 83% decline in applications by students' dependants for the same period (Sept-24).

ENGAGEMENT ACTIVITY (Not survey-related, # cases)	QTD	YTD

QUARTER END FMP MONITORING REPORT - END SEPTEMBER 2024

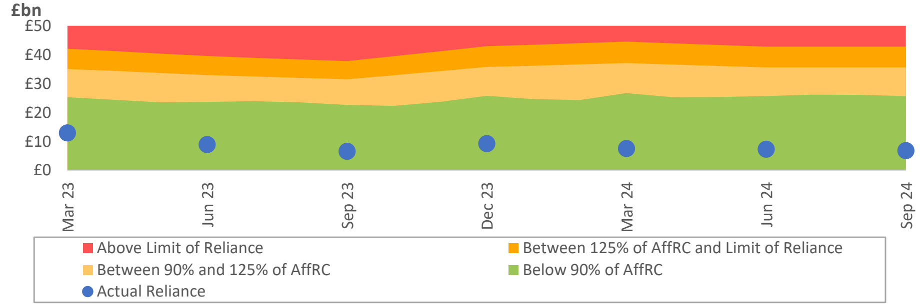
APPENDIX A - IRMF RAG rating definitions

Actual Reliance

Self-sufficiency liabilities + Transition Risk - Assets

Green	Less than or equal to 90% of Affordable Risk Capacity
Lower Amber	Between 90% and 125% of Affordable Risk Capacity
Upper Amber	Between 125% of Affordable Risk Capacity and Limit of Reliance
Red	Above Limit of Reliance (150% of Affordable Risk Capacity)

Actual Reliance

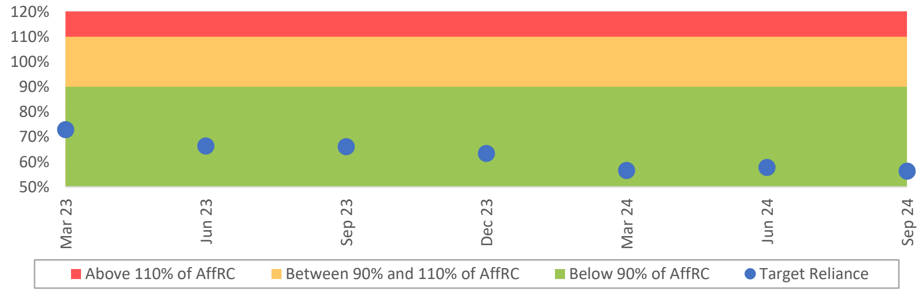


Target Reliance

Self-sufficiency liabilities + Transition Risk - Technical Provisions

Green	Less than or equal to 90% of Affordable Risk Capacity
Amber	Between 90% and 110% of Affordable Risk Capacity
Red	Above 110% of Affordable Risk Capacity

Target Reliance as % of Affordable Risk Capacity



Contribution Metric

Green	If the total contribution requirement is less than or equal to 23% (i.e. the current contribution rate plus a margin)
Amber	If the total contribution requirement is between 23% and 26%
Red	If the total contribution requirement is greater than 26%

The metric will be deemed to have triggered if 'Red' for two consecutive quarter-ends

Contribution Metric

It is published on our website for information only and is not intended to provide sufficient information to support any decision making.

QUARTER END FMP MONITORING REPORT - END SEPTEMBER 2024

APPENDIX B - Investment Risk RAG rating definitions

1. Probability of Actual Reliance exceeding Limit of Reliance in three years

Green	< 1%
Amber	1% - 5%
Red	> 5%

2. (a) Probability of Actual Reliance exceeding Affordable Risk Capacity in three years

Green	<10%
Amber	10% - 25%
Red	> 25%

2. (b) Self-sufficiency funding deficit 1-year Value at Risk

Green	< £20bn
Amber	£20bn - £25bn
Red	> £25bn

3. (a) Probability of the contribution requirement exceeding 26% in three years

Green	< 15%
Amber	15% - 30%
Red	> 30%

3. (b) Probability of TP full funding in 2032, allowing for contributions of 26% from 2026

Green	> 70%
Amber	60% - 70%
Red	< 60%

Overall Investment Risk Metric

Green	Where the underlying metrics are all green
Amber	Where at least one underlying metric is not green, but no underlying metrics have been red at two consecutive quarter ends
Red	Where at least one particular underlying metric has been red for two consecutive quarter ends
